**TOURIST GUIDE  
2026/2027**

**The coat of arms of Kraslava Municipality** was approved in 2012. Its authors are artists Silva Linarte and Andris Pudāns. The coat of arms of the Kraslava Municipality depicts nine times division with gold and black on one side, and a golden bishop's scepter on a red background on the other side. The history of Kraslava is deeply connected with the name of the Counts Plater's, and from the coat of arms of the Counts Broel Plater family, the coat of arms of the Kraslava region borrows 5 golden bands on a black background, describing the 5 rays that pass through the darkness and bring light, hope. The golden color in the coat of arms symbolizes the Christian faith, prosperity. On the other hand, the scepter (wand) is considered one of the oldest symbols of power.

**The coat of arms of the town of Kraslava** was approved in 1925. A silver sailing ship with five oars floating in the blue field of the coat of arms symbolizes the multinational environment of the Kraslava region – the five nationalities of the population – Latvians, Russians, Belarussians, Poles and Jews, who have lived in Kraslava and its region over the centuries, by accepting the differences and looking for the common. They have also enriched each other with their culture, thus creating a special tolerance of the peoples.

**The coat of arms of the town of Dagda** was approved in 1997. The coat of arms depicts a phoenix rising from red flames on a golden background. Phoenix – a legendary bird. It has the ability to burn up in its nest in old age, then be reborn from the ashes. The phoenix is a symbol of immortality, eternal renewal, and rebirth. In the upper right corner of the coat of arms, a black trefoil cross. The cross is a symbol of the Christian religion.

## Welcome to Kraslava Municipality!

Have you heard the most beautiful melody of nature, when the chirping of birds, the chirping of grasshoppers, the croaking of frogs and the rustle of the wind combine in a common musical piece?

Have you seen nature's most beautiful cinema? It has blue, blue skies and bright yellow sun glinting across the clear waters of the lakes. A spider is crawling along one dew-lit stem, an industrious ant is crawling along the other. But above all – the whispers of the ancient land...

Through the morning fog walks a person who fits so freely into this tale that it seems it cannot be any other way. There are places where you can find time to look at the ant's march, listen to the bird's message and look at yourself, where you can remove the daily masks and truly be yourself... You think it's impossible? It is not so easy to find such a corner of untouched nature, but still... Do you know where such a place is?

Look for it in Latgale! It still retains its original charm and special aura. In the south-east of Latvia, in a picturesque old valley, surrounded by the river of our destiny, **lies the Kraslava Municipality**. It invites you to explore and experience nature, to get to know the multi-ethnic culture and people of the region, to return to two centuries old history and to appreciate the impact it has had on the modern daily step in the town. Here, the primordial breath of nature intertwines with the veil of historical mystery and modern architecture and technology.

It is a place where you want to come back again and again...

We invite you to enjoy your holidays on one of the lake shores, try your hand at good luck fishing, recover your strength in the country sauna, indulge in your dreams while watching sunsets and sunrises, go for a walk through the morning dew, discover the nuances of the flavours of Latgale's culinary heritage, gain new emotions by rafting or boating along rivers and lakes of Kraslava County and immerse yourself in the world of talent provided by ceramicists, weavers and artists.

### 1 Count Broel Plater's Palace

The palace is 18th century architectural monument of national importance. The central building of the complex is the Palace of Count Broel Plater, which was built according to the project of the Italian brothers and architects Parako. Construction was completed in 1791. At first the palace had a baroque-style decor, but in the late 18th and early 19th centuries it was rebuilt after the canons of classicism. The interior walls of the palace are painted with views of ancient Rome. When Counts

Platers' left Kraslava during the First World War, the castle was plundered. From 1923 to 1972 the palace was made into a school. Later, the school was moved to another building and the palace was left empty and lost its attractiveness. Reconstruction of the palace began at the end of 20th century, but was not completed. In 2008–2011 the facades of Kraslava Palace were preserved and in 2016 the maintenance of the facades was carried out - illusory windows on the 1st floor were created. Currently, the palace can be seen only from the outside.

### 2 Courtyard of the palace

Entering the central gate from the side of Pils Street, there is a view of the inner courtyard of the palace complex. Its most noticeable object is **a manor house – the palace**. The courtyard is bordered by outbuildings and a palace park. On the right side of the courtyard is **the former stable** (currently the museum's exposition and the palace restaurant), then the servant's house (now Kraslava County Museum). To the left of the central gate is **the palace manager's house** (now Tourism Information Centre), next to it is **the barn-gardener's house**, and on the left side of the courtyard- next to the palace, visitors can see the town and River Daugava from **the observation platform**. The palace complex is surrounded by a park on all sides. During the renovation of the complex, the courtyard paths were restored according to their historical planning. Since 2015, the courtyard of the palace is decorated with **a metal carriage**, which is a popular place for photography.

### 3 Arch

In the eastern part of the palace ensemble, several unusual architectural elements have been preserved – a stone arch, fragments of walls and a gate. Visitors have the opportunity to walk along the paths of the park, to enjoy the atmosphere of the 18th century – to see the brick gates created by ancient masters and to walk through a stone arch.

#### 4 Grotto

The Platers built two grottos of boulders and travertine near the palace in Kraslava Landscape Park, which endowed the park with special romance and melancholy. At present, one of the

grottos with an „underground passage” and the lion statue is well – preserved and accessible to residents and tourists. The grotto was built in 1843, when an ambitious reconstruction project took place in Kraslava Park.

#### 5 Sculpture "Count and Countess"

Complementing the Count Plater's Palace Complex with suitable and thematic environmental objects, two large sculptures of the Count and the Countess were installed in the summer of 2020, which harmoniously fit into the landscape of the Palace Park and became one of the most recognisable elements of the Palace Complex.

#### 7 Granary - gardener's house

Granary - gardener's house is located on the right side of the building. The exact time of construction of the building is unknown, but the red bricks and brick turrets in the corners indicate that it was built in the second half of the 19th century. In the middle of the granary was a long corridor which had storage for various belongings and products on both sides. It is known that salt was stored in one of the brick turrets.

At present, further use of the building has not been determined. A conservation project has been developed and roof replacement works have been carried out at the beginning of 2017.

#### 6 Observation platform

The observation platform was established in 2004 on the ruins of a former greenhouse-orangery, where grapevines, apricots, pineapples and other warm-earth plants were grown during the Broel Plater times. The observation platform offers a beautiful view of the Nature Park "Daugavas loki", which was included into the Latvian National List of UNESCO World Heritage Sites. In 2016 the observation platform was fully renovated.

#### 8 "Forest Trail" for children

There are many children among the visitors of the Count Plater' Palace Complex in Kraslava. To make the visit for small visitors even more exciting, a small obstacle course was opened in 2021 behind the former governor's house building. "Forest Trail" is freely accessible to children under 12 years of age.

#### 9 Landscape Park of Count Plater's Palace Complex

The Landscape Park of about 22 hectares was built around the palace, on the slopes of the Daugava valley. The park's dendrological composition is very diverse – 70 species of trees and shrubs. The snails that were brought from Spain, still live here too. There was a pheasant farm near the park and pheasant caretaker was specifically brought from Germany for its maintenance. The very first Kraslava Park was established in the middle of the 18th century near the building of Count Broel Plater's Library. The specifically created baroque garden, like the Tsar's Garden in Riga, was a so-called public garden – accessible to all free townspeople. At the time, it was a significant and a very progressive innovation. Part of the old baroque park called "Linden tree garden" is still preserved.

#### 10 Stairs

At the end of the 18th, the beginning of the 19th century, during the reconstruction of Kraslava Park, many paths were created on different levels of the hill. They were connected by a staircase in two places, which was placed so that walking along the paths – a view of the Daugava valley opened up.

In 2011, during the first stage of the park reconstruction, a new staircase was created, the location of which approximately coincides with the location of the former staircase.

### Interior exhibition

#### “Count Plater’s Notary Cabinet” (“Grāfa Plātera notāra kabinets”)

The exposition covers the period of the history of Kraslava from the 19th century until the end of the 20th century. In the 1920's, when the history of Kraslava, which for almost 200 years was connected with the name of the Count Broel Plater's dynasty, took a significant turn, as a result of which, the Platers' lost their former power and influence in Latgale and left Kraslava. The exposition presents the fates of two families of Kraslava - Šarkovski and Rabinoviči. The authentic objects allow you to feel the atmosphere of that time, those belonging to Šarkovsku family: 19th century "H. Gentsch" grand piano, steward's uniform buttons with the coat of arms of Count Broel Plater, faience and porcelain dishes from the Kuznecova factory, the seal of the last owner of the Kraslava Palace - Countess Marija Stefania Anna Franciska Broel Plater and 19th century furniture and photographs.

#### Exhibition “Five Oars” (“Pieci airi”)

The museum offers a unique exposition created in a 17 m long improvised boat. Over the centuries, people of different nationalities have lived in Kraslava and its district, who have learned to live together, accepting the differences and looking for the common and have enriched each other with their culture, thus creating a special

tolerance of peoples. In 1925, the coat of arms of the city of Kraslava was approved, which depicts a silver boat with five oars on a blue background. Five oars symbolised the nationalities living in Kraslava at that time: Latvians, Poles, Russians, Belarusians and Jews. The purpose of the exhibition “Five Oars” is to trace the interaction between these nationalities over the centuries, from the most ancient times to the present day.

### Digital exhibition "The Wooden Architectural Heritage of Kraslava"

The exhibition reveals the architectural heritage of the historic wooden houses of the Kraslava Municipality, and the craftsmanship created by their craftsmen. It demonstrates the architectural details of houses – gates, doors, verandas, windows and their decorative elements, which have created the characteristic appearance of wooden houses in rural areas and cities. The exhibition allows you to get acquainted with the wooden structures that were made with patience and skill and the delicate decorations that have given the buildings their authenticity. It is also complemented by a selection of tools, which helps to understand the working methods of craftsmen and the process of creating practical and decorative elements of the houses.

### Exhibition "At one table" ("Pī vīna golda")

It provides an opportunity to get acquainted with the culinary heritage of the nationalities living in the region, which has been preserved and put on the table from generation to generation. People of several nationalities have called Latgale their home for hundreds of years. The cuisine of the nationalities living in Latgale has been formed when traditional recipes met with the local Latgalian culinary customs, which then have been creatively transformed. Thanks to the responsiveness of the housewives of Kraslava region, it is possible to get acquainted with the culinary heritage of the nationalities living here, which has been preserved and put on the table from generation to generation, ensuring the preservation of recipes for future generations. The exposition covers the period from the beginning of the 20th century to the present day.

### Exhibition "Workshop of the artist Valentīns Zlidnis" ("Mākslinieka Valentīna Zlidņa darbnīca")

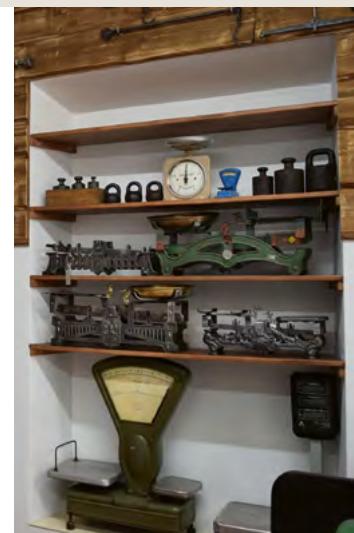

It is a story about the life and creative activity of V. Zlidnis, a colorful painter from Latgale. Here you can feel the artist's creative spirit, listen to the fascinating sounds of Latvian kokle music, take a closer look at the artist's work, which reveals the enchanting world of color art and the unique handwriting of V. Zlidnis. The animation "When the paintings come alive... The moods of Valentin Zlidnis artworks" is an unconventional insight into the artist's work.

### Collection "The Story of the Old House" ("Vecās mājas stāsts")

Reflects the variety of household objects and the interior of the living space in the period from the end of the 19th century to the 70s of the 20th century. It is a story about the way of life, traditions and culture of previous generations. In the open collection, visitors have the opportunity to view 747 museum items, and this number is planned to be gradually increased.

The objects have been collected in the Kraslava region, thanks to the responsiveness of the region's residents, the desire to cooperate, preserve and pass on historical evidence to future generations.

### Collection "The Heritage of the sculptor Vanda Zēvalde" ("Tēlnieces Vandas Zēvaldes mantojums")

The collection of the Kraslava County Museum contains sculptures created by the sculptor V. Zēvalde, busts of famous cultural, artistic and political workers, large-scale sculptures as well as small sculptures, drawings, sketches and twills, as well as many documents, exhibition posters, catalogues, albums and photographs that capture her life and work. In total, 863 items are available for viewing in the open collection, which are placed on specially installed open shelves and large-format drawers, that ensure the conditions for storing and displaying works of art, as well as undeniably improve the public accessibility to the collection. In 2020, the open collection "Legacy of Sculptor Vanda Zēvalde" received the annual award of the Association of Latvian Museums.

### 15 The Central Town Square

18. novembra laukums, Krāslava

The Market Square was created in the 18th century. Its main buildings were the town hall (not preserved), which was built in 1752, and the pharmacy, which has been operating in this building since 1810 and performs its functions even to this day. The square was bounded by one and one-and-a-half-story wooden and masonry buildings with outbuildings. They were mainly residential houses of merchants and artisans and entrances to stables and shops. The main building - the town hall was placed at the eastern end of the square. It was a free-standing two-story building, on its first floor there were customs, weights and measuring rooms, and later also

shops. The square was located near the main highway - the postal road from Riga to Moscow. In 1923, the building of the Latvian Society was opened on Rīgas Street opposite Tīrgus Square (Market Square).

In 1990, the Town Square was renamed to 18th November Square. There is a recreational area here, where vacationers are delighted by a fountain in the shape of the city coat of arms and Mazā Tīrgus Street, which turns into an illuminated fairytale valley in the evenings. In the central square, on the wall of the former cinema located on Rīgas Street, there are large-format old photographs of Kraslava prepared by the Kraslava photo club "Zibsnis".

### 16 The Monument "Mother Latgale is crying" ("Māte Latgale raud")

Rīgas iela (behind number 52), Krāslava

Opened on 11th November in 2003. It is dedicated to the memory of all victims of Kraslava Municipality during the terror of occupational regime. The sculptors are Indulis and Ivo Folkmaņi from Daugavpils. The monument is erected as a thanks to the initiative of Kraslava department of politically repressed and with the support of the Latvian fund.

### 17 Augusta Stone

Augusta iela 12, Krāslava

The coat of arms of Counts Broel Platers and the year number "1729" are engraved in the stone. During this year the Count Plater's Palace was bought by Count Jan Ludvig Plater. It is named the August stone in honour of the Polish king August II, who visited Kraslava in 1729. The stone was also the boundary stone of the city.

### 18 Adamovas Hillfort, observation area, Kraslava chair

Augusta iela 3a, Krāslava

Coming to the Kraslava town from the direction of Riga, the guests can see Adamovas Hillfort. It is situated on the edge of the ancient Daugava's valley between two deep ravines. The height of the hill is 40 m. As many other places on the banks of the Daugava, this ancient hill was inhabited too. In 1958 archeologically unexplored ancient hill was destroyed because of the constructive works on a new Riga - Kraslava highway. Nowadays the observation area of the castle mound is the most favourite place for walks for the town's inhabitants and guests.

### 19 Karnicky Monument, Austrīja Stone and telescope

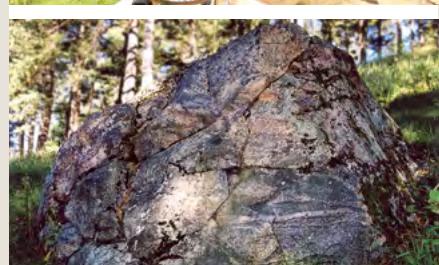

Augusta iela (behind number 28), Krāslava

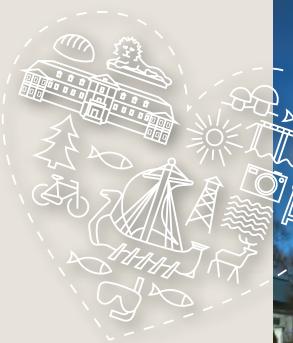

A picturesque place that has a connection with a romantic legend about a big and devoted love between Count Plater's daughter Emilia and a Polish officer Joseph Karnicky (Jozefs Kārnīckis). A fascinating event with a tragic end, which happened in 1838 in Kraslava. During one of the dancing parties Count Plater's daughter Emilia got acquainted with the owner of Eversmuīža - a military officer Joseph Karnicky. The young adults fell in love with each other. Count Plater was against that love, he had planned to marry Emilia off to a wealthier man and a more notable representative of their family circle. Emilia and Joseph decided to kill themselves on one day: Joseph had to shoot himself on one of Kraslava's hills, but Emilia had to jump out of the window of the third floor of Count Plater's Palace.

As agreed - Joseph shot himself, but Emilia was saved by a servant at the very last moment. Joseph was buried in the place of his death, where the monument was built. The inscription on the tombstone said: "Don't judge and you won't be judged as well". After some years his remains were reburied in Eversmuīža, but the monument remained in Kraslava. The beautiful story of the big and faithful love is told from generation to generation. That place is named Karnicky's Hill or the Hill of Love.

Not far from the Karnicky Monument is the **Austrīja Stone**. Living in Latgale, the Latvian writer Antons Autriņš created his works near this great stone in 1909.

In 2020, a **viewing telescope** was installed at the top of Kārnīcka Hill, which now allows visitors to enjoy a tenfold magnified view of the River Daugava bends and the wooden architecture of Kraslava.

## 20 Kraslava Lutheran Church

Phone: +371 26173083  
Grāfu Plāteru iela 2,  
Krāslava

The Lutheran Church of the Count Platers's Palace is situated in Kraslava. The first foundation stone had been placed in 1935; the church had been consecrated in 1938. The church had been working up until 1944. In the 1950s, the church tower had been pulled down. In 1984 the museum exhibition hall was established and it was located here until 1996, when the congregation regained the church. Services in Kraslava Lutheran congregation are held on the 1st and 3rd Sundays of the month.

## 22 Kraslava Roman Catholic Church of St. Ludwig's

Kraslava Catholic Church is the brightest example of baroque architecture in Latgale. This is the first wooden church for catholics in 1580-1590 built by Mīkelis de Brunovs. The church was built between 1755 and 1767 according to the project of the Italian architect Antonio Paraco. The 18th-century fresco "St. Ludwig goes on a crusade" painted by the Italian artist Filippo Castaldi is located in the altar part of the church. The restoration work was carried out for 12 years and was completed in 2015. Special mention should be made of the relics of the martyr St.Donatas, which attract a large number of believers, thus making Kraslava the second largest place of pilgrimage in Latgale after Aglona. From 1757 to 1844, a **religious seminary** operated near the church – **the first higher educational institution in Latvia**.

From May 15 to September 15, the church is open from 10.00 to 19.00. Enquire in advance at other times.

## 21 Old-Believers Church

Phone: +371 22323536, Rīgas iela 135, Krāslava

Russian Old-Believers have been living in the territory of Latgale for more than three hundred years. According to the information received, one of the Old-Believer's church was on the Daugava's bank in Rātūža Street. The Parish was officially registered in 1850. A local merchant gave up his outbuildings to rebuild and make an Old-Believers church approximately in 1859. It was sanctified to the honor under the shelter of God-Mother. The Church caught fire on December 7th 2002 and damaged the building and some valuable icons. The construction of a new Old-Believers church was begun in the place of the burnt down old chapel. The sanctification of the building was in October 26, 2008.

**30 Fountain "Sailing boat with five oars"  
("Buru laiva ar pieciem airiem")**

18. Novembra laukums, Krāslava

The fountain was opened in July 2010 and it represents the symbol of the city – a sailboat with five oars. Each oar of this boat symbolises one of the nationalities of the indigenous people who have lived in the territory of Krāslava since ancient times – Latvians, Russians, Belarusians, Jews and Poles.

**32 Kraslava Chair and large-format Photo Wall "Daugava Diggers"**

Augusta iela 3a, Krāslava

An environmental object – **Kraslava's Chair** – has been installed on the hillfort of Adamova, where a magnificent view of Krāslava and the Daugava valley is. Why a chair? The answer to this question is related to the name of the city of Krāslava. One

of the explanations for the origin of the name of Krāslava states that the name comes from the Latgalian word "krāsls" – a chair, because the river Daugava near Krāslava throws several arcs that resemble a chair in shape.

The **photo wall** was installed in 2020 and depicts the five main characters of the literary work "The Tale of How Beasts Dig the Daugava" – a hare, a fox, a mole, a badger and a bear.

**33 Stone Chair by River Daugava**

Kaplavas iela (by the river Daugava), Krāslava

In 2017, Rēzekne businessman Artūrs Zeiļa, through the mediation and support of the artist family Folkmanji, donated a special stone to the city of Krāslava. Part of the stone was chipped, resembling a chair in appearance and function, so the object seemed to belong to Krāslava, as it fits with one of the legends about the origin of Krāslava's name.

On the stone, Ivo Folkmanis created a deep inscription "Daugava" and an iron raft motive. Looking from different angles, it seems as though the raft is floating on the Daugava.

**31 Kraslava Town Hall**

Near Rīgas ielas 54 house, Krāslava

The first monumental masonry building in Krāslava – the Town Hall – once stood on this square. At the beginning of the 19th century, the town hall, like most of the buildings in Krāslava, suffered a fire, as a result of which the tower and the second floor of the building were demolished, but the first floor continued to be used as a cultural center and later as a sports school. In 2016, the building was demolished.

The environmental object "Town Hall" was then created in the summer of 2021 by artists Mairita and Ivo Folkmanji based on a drawing by K. Rēmera.

**34 Photo frames in Krāslava**

It is possible to see two elements of design in Krāslava on the streets of Ostas and Vidzemes. There are wooden photo frames decorated as old carved frames with the idea to show the beauty of the picturesque valley of the River Daugava and make Krāslava more attractive for its inhabitants and visitors. The idea of creating photo frames belongs to photoclub "Zibsnis".

Express yourself as an artist and a photographer, take picture of fascinating miracles on the bank of the River Daugava!

### 5 Dagda Manor Park with the cave

Phone: +371 25727379

Parka iela and JIC "Parka rozes", Dagda

The 300 years old Dagda Manor Park is the only one left from the Dagda manor established in 17th century. A great place for walking. There is a hill in the center of the park and a stage, where Līgo, Anna's day, etc. are celebrated every year.

There is also a small cave in the territory of the Dagda Manor Park - unlike the other caves in Latvia, which are made of sandstone or carved out of dolomite, the Dagda cave is considered a natural phenomenon because it was formed from gravel and pebbles. The cave is protected geological and geomorphological natural monument. It is easily accessible through the territory of Dagda's Youth Initiative Center.

### 6 Dagda Hillfort

Phone: +371 25727379, Purpli, Dagdas pagasts

Dagda Hillfort (also known as Zamok) is a national archaeological monument (No. 1071), built on a narrow glacial ridge about 20 m above the surroundings, with an absolute height of 175–180 m above sea level. Its plateau measures roughly 100 × 50 m, featuring a 2 m deep central hollow. The site is protected by two southern rampart-and-ditch systems, a steep eastern slope, and a narrow northern ridge, forming strong natural defenses. Archaeological finds – Iron Age pottery and artifacts – show that the hillfort was inhabited and fortified in ancient times.

### 7 Lubānes Hillfort

Phone: +371 25727379

Daugavpils iela, Dagda

Lubānes Hillfort, rising about 30 m above the surrounding area (absolute height ~174 m), is located on the western edge of Dagda, near the small Lake Luboneņš. The flat top of the mound, about 50 m in length, once served as a settlement area, and a clear spring still flows there. Today, the castle mound is a popular walking and viewing spot, offering wide views of Dagda and the surrounding fields, and is a nationally significant cultural monument.

### 8 Dagda's historical mural

Asūnes ielā 2 (in the courtyard), Dagda

The idea of creating the painting came from the local history society "Patria". The photo taken in the 1930s came to its leader as a gift from the noblemen's Kibortu grandson Rišarda Labanovskis. The artist, Jans Bartkevičs, a resident of Dagda, turned an 8x11 cm photograph into an 18 m<sup>2</sup> painting within a week.

## ENVIRONMENTAL OBJECTS IN DAGDA

### 2 The Museum of Happiness

Phone: +371 20266514, Sporta iela 2, Indra

laime.indra@kraslava.lv

The Museum of Happiness is created in Indra as a gift for 100th Anniversary of Latvia. Its interactive exposition invites everyone to feel, think and look in the future, not in the past. The museum's task is not to give an answer to the question "What is happiness?", but stimulate people to be positive, creative, and inspirational and to show the diversity of happiness.

Indra attracts more and more visitors, so Indra's guests will be surprised by **Indra's craftsmen room**. Here you will be able to get acquainted with the products of local craftsmen and buy unique souvenirs! A team of parish masters has worked on the creation of the craftsmen's room.

The Museum of Happiness developed a new program for museum visitors – "**My grandmother's dish cabinet**", located in Indra (at Krāslavas Street 3). During the tour, visitors will get acquainted with a unique collection of Rīga porcelain dishes – **more than 1000 items**.

The manager of the Museum will tell you about the history of Rīga porcelain, the popular tableware sets, factory ceramics and the history of acquiring collection exhibits. A practical lesson will also be offered - guests will have the opportunity to choose their favourite teapot and using the offered herbs (about 20 varieties) make tea that will improve their feeling of happiness and health. At the end of the program – a tasting of tea. Duration of the program: approximately 1 hour.

Before visiting the Museum of Happiness in Indra, please contact the manager of the Museum of Happiness by phone +371 20266514.

## MAP OF KRASLAVA MUNICIPALITY

## MAP OF KRASLAVA MUNICIPALITY

### 1 Lake Rāzna National Park

is the newest and the second largest of the four national parks of Latvia, established in 2007 on an area of 59,615 hectacres in order to preserve the natural, cultural, historical and scenic values of the surroundings of Lake Rāzna. Seen from a bird's eye view, the landscape of Rāzna National Park is a unique composition of hills and lakes. Forests, meadows, golden grain fields are covered with hills, which in Latvia we call mountains, and between them – mirrors of larger and smaller lakes, among which is Lake Rāzna – the largest lake in Latvia in terms of water capacity, locally known as the Latgalian Sea. Part of the park is also located in Andzeļu, Andrupenes and Ezernieku parishes of Kraslava County. The territory of the national park also includes the richest lake of the Baltic islands – Lake Eša (Ežezers).

### 2 The Area of Protected Landscapes "Augšdaugava"

is a Natura 2000 area. It includes the geological formations of the Nature Park "Daugavas loki" – Adamova Gorge (Adamovas krauja), Daugava's gates (Daugavas vārti) (Slutiški and Ververu gorge), Mālkalnes spring, Sandarišķu kare gorge (Sandarišķu karengrava), Sproģu ravines (Sproģu gravas), Vīļušu spring, dendrological plantations – Hoftenbergas Park, Juzefovas Park and Rozališķu Park. The territory was established to preserve outstanding cultural and natural scientific values in the Daugava Valley and its surroundings. The River Daugava has long been a trade route. Settlements and cemeteries were built on its banks, it has been the basis for the development of the landscape (as a natural and human creation). A large number of protected plant and animal species can be found in the territory.

Nature Park "Daugavas loki" was founded in 1990. It is located in the valley of Daugava, the fateful river of Latvia, in the area of protected landscapes of the upper Daugava, in the section from the western border of Kraslava to Naujene on an area of 12,372 hectacres. The most characteristic feature of nature is 9 large bends of Daugava, the length of which reaches 4–6 km. Many natural, cultural and historical monuments can be found in the territory of the park. In 2011, it was included in the Latvian National List of UNESCO World Heritage.

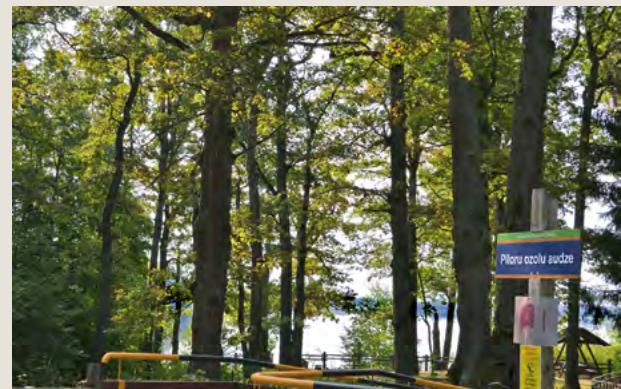

#### 4 Lake Sīvers

Skaistas and Aulejas pagasts

It is the ninth largest lake in Latvia. In the summer and autumn of 2014, nature experts explored Lake Sīvers and its surroundings. The largest occurrence of the fine naiad (*Najas tenuissima*) in the world has been recorded here. One of the main guarantees of the existence of Sīvers unique natural values is its clean and clear water. It is a popular spot for swimmers as well as a fisherman's paradise. Pike, perch, roach, tench, bream, eels and many others fishes live here.

#### 6 Pilori oak grove on the shore of Lake Eša (Ežezers)

Phone: +371 29139677, +371 25727379

Pilori, Andžeju pagasts

Pilori (Pilāru, Piljoru) oak grove is one of the rare pure oak groves in Latvia, located on the shore of Lake Ežezers (the lake with the most islands in Latvia, and even in the entire Baltic). There is a small car parking area, a trail, an information stand, a rest area with a boardwalk, and available amenities. The place is in the national defence since 1928.

#### 5 Lake Čertoks (Velnezers)

Šķeltovas pagasts

Lake Čertoks, or Velnezers, is a 53 hectare acres sized nature reserve created in 1977, its greatest value being its mysteriousness and uniqueness. It was formed in a funnel-shaped depression of suffusion and reaches a depth of up to 17 meters. Its slopes are covered with dry coniferous forests, which is a protected forest habitat in Europe. One of the greatest values of the Lake Čertoks Nature Reserve is the landscape and its peculiar terrain.

The main manager of the lake, JSC "Latvijas valsts meži" in cooperation with Daugavpils University near Velnezers, has created a well-maintained trail, which also helps preserve and protect the beautiful landscape around the lake.

#### 7 Pavilion "Confluence: a Stop at the Border"

Tālr.: +371 22185954, +371 25727379

3 km ceļa posmā no Dagda – Asūne, Ustje, Dagdas pagasts

GPS: 56.0727, 27.5499

This is the first stop of the initiative "Izstāigā pierobežu / Hiking the Borderland." A small wooden pavilion, 3 x 3 meters in size – a quiet presence in the landscape, constructed without metal joints using traditional building methods. Its vertical form resembles border towers and chapels, while the circular window onto the viewing platform symbolically marks a meeting place. The pavilion is **freely accessible to everyone** – a place to pause, listen, and feel how the border transforms into a confluence. Author: Marta Ventere with her team.

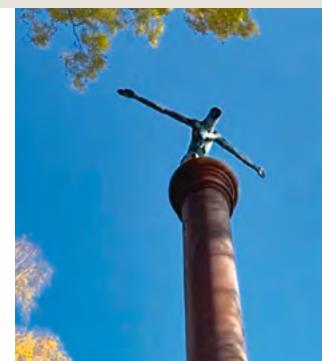

#### 8 Sculpture Park "Pudža Island" on the shore of the Lake Geranimova Ildzs peninsula

Tālr. +371 26110308

Agureckaja, Kastuļinas pagasts

GPS: 56.1516, 27.1605

Here you can view the tallest sculpture in Latgale created by sculptor **Pauls Pudža** – a 12.7-meter-high column featuring a bird-man figure that symbolizes play and freedom. The sculpture park is gradually expanding each year, offering new artworks and scenic views. It is approximately a 30-minute walk along a picturesque route to reach the sculpture.

#### 9 Lake Drīdzis

Skaistas pagasts, Kombuļu pagasts

Drīdzis is the deepest lake in the Baltics. The maximum depth reaches – 65.1 m. The lake is characterised by an elongated shape, it meanders like a river and forms many bays. There are nine islands on the lake, the largest of which is Bernātu Island (13.9 ha). A wide, unrepeatable panoramic lake view with many lakes opens up from the hilly areas. Lake Drīdzis is part of the protected nature park area, included in the Natura 2000 territory.

## 10 Adamovas Nature Trail

The Adamova Nature Trail was created in 1998 by students, faculty and staff of Daugavpils Pedagogical University under the leadership of Professor B. Jansons. The trail is located in the specially protected landscape area "Augšdaugava" and in the Nature Park "Daugavas loki", which is included in the Latvian national list of UNESCO World Heritage.

The beginning and the end of the trail is in Kraslava, from the viewing area (entering the city from the Daugavpils side).

**Length:** 1.7 km

**Availability:** all year round, the trail is marked.

The scenic trail can be followed by choosing a more **difficult or easier route in terms of terrain**.

The route with the most varied terrain leads through a primeval forest of slopes, across the mysterious Svarinsku ravine and loops up and down. Stairs have been installed in the steepest parts of the trail and the most dangerous places have been cordoned off. Several bridges and a viewing platform have been installed.

## Lake Trail (Ezertaka)

Ezertaka is a long-distance hiking route of Latgale, the total length of which is about **1070 km**. The route is divided into 49 stages, 13 of which are longer and will take several days to complete. Geographical stages are divided according to location – North Latgale (9 stages), Central Latgale (25 stages) and South Latgale/Selia (Sēlija) (15 stages).

On average, 134 lakes and other bodies of water can be found along the Ezertaka route.

The route includes one of the deepest lakes in Latvia – **Geraņimovas-Ildzas** (46 m), **Lielā Gusena** (38 m) and **Ormjās** (43 m) lakes in Kraslava Municipality, Riču (Latvian side – 39.7 m) and Sventes (38 m) lakes in

Augšdaugava county. The Lake Trail runs along **Lake Ežezers** – Latvia's richest lake with the islands.

Lake Trail (Ezertaka) includes markings in nature on natural objects (trees, stones) and road signs in white-green-white color.

The total length of the track is **approximately 125 km**: In the territory of Kraslava Municipality, the route is divided into 6 stages.

- 1) Ežezers–Andželi–Jaundome–Dagda (24 km)
- 2) Dagda–Asūne–Robežnieki (23 km)
- 3) Robežnieki–Karklinova–Indra (15 km)
- 4) Indra–Lupandi–Piedruja (18 km)
- 5) Piedruja–Indrica–Baltica–Krāslava (30 km)
- 6) Krāslava–Kļajumi–Lielborne (16 km)

The second route of the trail leads along the River Daugava, revealing beautiful natural landscapes. It can be used by those who prefer not to walk on the steep slopes. On this route, you can enjoy a walk through the forest along the Daugava, see a multi-stem aspen, a large stone and wooden sculptures. The Daugava bed, floodplain and terrace are distinguished by a large wealth of boulders, one of these giants can also be found in the lower part of the Adamova Nature Trail.

**1 Adamova Big Stone.** It surprises with its grandeur and mystery. The boulder brought from the Scandinavian glacier has a volume of around  $11 \text{ m}^3$ .

**2 Five Sisters.** Multi-stemmed trees, which usually grow from stumps, are found throughout the trail, but one aspen is particularly notable. It gives the impression that five trees have grown together.

**3 The Stream.** Thousands of years ago it was stronger and louder – it also used to create a beautiful ravine.

**4 Svarinsku Ravine.** The ravine was formed as a result of streams of water (rainfall, springs) flowing down the slopes. The ravine has been swallowed up, it does not continue to form, as evidenced by the tree-covered slopes.

**5 Oak tree.** A natural monument of local importance under state protection. The circumference of the mighty oak trunk is 4.35 m.

There is a nature monument "Adamova Gorge" next to Adamova Nature Trail, that includes one of the River Daugava main

cliffs on the right bank of the river. It also has gleen source circles and different aged rock outcrops, one master rock and various geological formations.

In 2023 "Adamova" society established "Adamova Cliff Trail" that consists of many stages of steps as an addition to Adamova Nature Trail. Its length is 2km.

**Please take caution when walking on the trail, be kind to the nature!**

### 11 The Path of Love

Asūne, Asūnes pagasts

**Length:** 300 m

**Difficulty:** easy, accessible to people with mobility impairments.

**Availability:** all year round, the trail is marked.

The main highlight of this resting place is the sculpture of a couple of lovers and the legendary boat with a dragon's head. A beautiful place surrounded by an interesting legend.

### 12 Asariņa Trail

Andrupenes pagasts

**Length:** 2 km

**Difficulty:** easy, but not accessible to people with mobility impairments.

**Availability:** all year round, unmarked.

You can walk the trail (~2 km) in the pine forest around the picturesque forest Lake Asariņš. It will present one of the very rare biotopes - a coniferous forest on ossified relief forms and a unique forest lake - Asariņš, which is located in the territory of Rāzna National Park. Many call it the little brother of Lake Čertoks. A bit mystical in its appearance and surrounded by a pine forest. Vacationers have access to a well-equipped recreation area and a paved trail around the lake.

### 13 Swamp Trail in Andrupene

Skolas iela 5, Andrupene

**Length:** 800 m

**Difficulty:** easy/moderate, but not accessible to people with mobility impairments.

**Availability:** all year round, the trail is marked.

The Andrupene Swamp Trail is located behind the "Andrupene farmstead" Museum. The length of the trail is 800 m and it is marked. Wooden stairs lead down from the hill, where the moss swamp has formed due to the lowering of the terrain. Boardwalks lead out into a swamp covered with low pine trees. Walking along the footbridge, you can get acquainted with the vegetation of the marsh, which is represented by plants that are not demanding on minerals - moss sphagnum, tufted pillows, cranberries, poly-leaved andromeda, heather and hens.

### 14 The Trail of Happy Impressions in Indra

Sporta iela 2, Indra

**Length:** 800 m

**Difficulty:** easy, but not accessible to people with mobility impairments.

**Availability:** all year round, the trail is marked.

Next to the Museum of Happiness, there is Park Tēvija, where the Happiness Sensation and Nature Observation Trail has been created.

Acorns, pine and spruce cones, chestnuts, wood chips and branches, sawdust, gravel - these and other natural materials cover the sections of the trail that must be walked with bare feet. The trail consists of the following objects: Path of Happy Feet, Fragrant Paradise, Singing Aspens, Happy Meadow, Relaxation Place, Happy Choice, Happy Bridge, Fisherman's Happiness and Happiness Grove. It is an interesting and educational walking place for people of all ages.

### 15 Jaundome Nature Path

Jaundomes muiža, Novomisli, Ezernieku pagasts

**Length:** 880 m – along a built footbridge, 3 km – if you go all the way around.

**Difficulty:** easy, partially accessible for people with mobility impairments.

**Availability:** all year round, the trail is marked.

The path is linear. In dry weather, the trail can be walked in a circle, returning along the dirt road and along the edge of the field. While walking along the trail, you can see several natural and historical objects, such as **Ežezers**, **ice cellar and beer ruins**, **forest and a pond inhabited by beavers**. A **well-equipped recreation area** and a **boat shed** are available on the shore of the lake.

### 16 Jukumi Grumuška Mountain – Hillfort Trail

Jukumi, Andzeļu pagasts

**Length:** 1.9 km

**Difficulty:** medium difficulty, not accessible for people with mobility impairments.

**Availability:** all year round, the trail is marked.

The trail is circular.

In the sports amusement park, there is an opportunity to engage in active recreation, thus promoting a healthy lifestyle and fulfilling free time. Recreation in the sports park is intended for both adults and children.

The sports amusement park offers to play a military simulation game – **Airsoft**, a fun team game **"Footgolf"** and have a go at shooting in the **shooting range under the open sky** with an

airsoft gun, pneumatic gun or crossbow. The **aerial obstacle** course is popular among visitors. It is installed 2.5 m above the ground.

If you want a more peaceful rest, then you can go for a walk along the **"Angel's Feet"** Health Trail, which is 90 meters long. The trail is covered with 25 different sections and 13 natural materials. Especially recommended for people with orthopaedic problems.

We offer **team building** activities for group, school children or corporate bonding, celebrating birthdays – various sports team games in the fresh air, as well as groups have the opportunity to participate in master classes in soap making, candle making and wax hands, and **aqua grime**.

For overnight stays, we offer a **large rest house** (14 places) and **two small rest houses** (each 4 places). For relaxation, we also offer a small sauna, which is heated with wood and suitable for various events and relaxation. Next to the sauna, there is a **hot tub with a hydromassage**, which is suitable both for relaxation after a hard week of work and for meeting among friends. Bather services. Phytos sauna, massage and **infrared sauna**. **Inflatable water attractions** for children from the age of 7 (under parental supervision). **Book in advance!**
